## ES240-110 Variet Selection Application

### EASYSwitch Varients

This note describes the various triggering options separately available for the Easyswitch.

ES240-110 TDON : Mains switched to output 3 seconds after trigger on.

ES240-110 TDOFF : Mains removed from output 3 seconds after trigger off.

ES240-110-5V : Standard Easyswitch triggered by 5 VDC present at control terminals.

ES240-110-12V : Standard Easyswitch triggered by 12 VDC present at control terminals.

ES240-110-24V : Standard Easyswitch triggered by 24 VDC present at control terminals.

ES240-110-SK : All above varients protected from improper use by security key lock.

ES240-110-PFM : All above varients with output for remote sensing of mains power loss.
